

OptiCrop – AI Based Crop Recommendation System

Project Demo Planning

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction	Introduce the team, project objectives, and the agricultural problem addressed by OptiCrop.	2	Team Leader
2	Problem Statement & Solution	Explain the need for AI-based crop recommendation and present the OptiCrop solution.	2	Member 1
3	Live Application Demo	Demonstrate user login, crop prediction, fertilizer recommendation, and weather information.	5	Member 2
4	Technical Architecture	Explain the system architecture, machine learning model, Flask backend, and MySQL database.	3	Member 3
5	Results & Future Enhancements	Show prediction results, project benefits, and discuss future improvements.	2	Member 4
6	Conclusion & Q&A	Summarize the project and answer questions from the evaluation panel	1	Entire Team

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the challenges faced by farmers and the objective of the OptiCrop project.
2	Solution Overview	Describe the system architecture, technologies used, and key modules of the application.
3	Live Feature Demonstration	Demonstrate login, crop recommendation, fertilizer recommendation, weather information, and prediction results.
4	Q&A Session	Answer questions related to implementation, machine learning model, and future enhancements.
