

OptiCrop: Smart Agricultural Production Optimization Engine

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	Yes
5	Environment configuration file (.env.example or similar)	No
6	Deployed application URL (if hosted)	No
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	Na
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Local Deployment
Login Credentials (Demo)	Not Required
Platform / Hosting Provider	Local Flask Server
Repository Link	https://github.com/HemaVenkataBhavani/OptiCrop-Smart-Agriculture-Production-prediction
DemoVideoLink	https://drive.google.com/file/d/1im-cqVZBqqvxldiIM4mI-IHciQtoi9e6/view?usp=drive_link

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround/ Status
1	Prediction accuracy depends on dataset quality	Use larger and updated agricultural datasets.
2	Limited crop categories	Future datasets can increase coverage
3	No user login module	Can be added as a future enhancement
4	Local deployment only	Can be deployed on cloud platforms
