Project Name	OptiCrop: Smart Agricultural Production Optimization
Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1: Data Input	Stage 2: Recommendation	Stage 3: Cultivation	Stage 4: Harvest Analysis
Actions <i>What does the customer do?</i>	•Accesses the OptiCrop system •Enters soil nutrient values (N, P, K) •Provides temperature, humidity, pH, and rainfall data	•Reviews recommended crop suggestions •Analyzes suitability and expected outcomes •Selects the most appropriate crop	•Cultivates the recommended crop •Applies suggested farming practices •Monitors crop growth and yield	•Analyze yield and provide feedback
Touchpoint <i>What part of the service do they interact with?</i>	•OptiCrop Web Application •Data Input Form •User Dashboard	•Recommendation Engine •Prediction Results Page •Prediction Results Page	•Farming Activities •Monitoring Dashboard •Agricultural Guidance Resources	•Reports Dashboard, Feedback System
Customer Thought <i>What is the customer thinking?</i>	•"I want accurate recommendations for my farm." •"Will this system help improve my productivity?" •"I hope my input data is correct."	•"Which crop will give the best yield?" •"Can I trust these recommendations?" •"Will this increase my profits?"	•"I expect better agricultural outcomes." •"I hope the recommendations are effective." •"My investment should result in higher productivity."	•"How can I improve next season?"

Customer Feeling <i>What is the customer feeling?</i>	• Curious • Hopeful • Interested	• Confident • Excited • Reassured	• Satisfied • Motivated • Optimistic	• Motivated, Informed
Process Ownership <i>Who is in the lead on this?</i>	• Farmer/User • Data Collection Module • OptiCrop Interface	• Machine Learning Prediction Engine • Recommendation System • Backend Processing Unit	• Farmer/User • Agricultural Management Process • Crop Monitoring Activities	• Farmer, Agricultural Expert
Opportunities <i>How can we improve this stage?</i>	• Simplify data entry process • Add multilingual support • Provide input validation and guidance	• Improve prediction accuracy • Display confidence scores • Offer alternative crop recommendations	• Provide real-time alerts and notifications • Suggest fertilizer and irrigation schedules • Integrate weather forecasting and yield analysis	• Yield analysis and future recommendations
